Career Objective

Aspiring Software Engineer skilled in Java, Spring Boot, Angular, PostgreSQL, and Git, with hands-on experience in full-stack and AI-based projects. Passionate about building scalable applications and solving real-world problems.

Education

B.Tech Information Technology

Panimalar Engineering College, Chennai

2022 – 2026

CGPA: 8.92/10

Technical Skills

Languages	Java, JavaScript, TypeScript, Python
Backend	Spring Core, Spring MVC, Spring Boot, Spring Data JPA, Hibernate, REST APIs
Frontend	Angular, HTML5, CSS3, Tailwind CSS
Databases	PostgreSQL, MySQL
Testing	JUnit, Mockito
Tools	Git, GitHub, Postman, Swagger UI, Eclipse, IntelliJ IDEA, VS Code
AI/ML	YOLOv8, DeepSORT, OpenCV, Flask

Professional Training

Capgemini – Java Full Stack Training Program

Jan 2026 – Jun 2026

- Completed intensive training in Java, Spring Boot, Angular, SQL, REST APIs, Git, and Agile development.
- Developed enterprise-level full-stack applications using Spring Boot, Angular, PostgreSQL, and JPA/Hibernate.
- Implemented REST APIs with pagination, exception handling, validation, and database integration.
- Collaborated in sprint-based development, Git version control, project presentations, and code reviews.
- Tested REST APIs using Postman, documented APIs using Swagger, and implemented unit testing using JUnit.

Projects

Digital Gold Wallet

Java, Spring Boot, Angular, PostgreSQL, REST APIs, JPA/Hibernate

- Developed a full-stack digital gold trading platform supporting virtual gold transactions.
- Designed and implemented REST APIs for wallet management, payments, and transaction history.
- Implemented Spring Data JPA, pagination, global exception handling, validation, and database integration.
- Integrated Angular frontend with Spring Boot backend services and tested APIs using Postman and Swagger.

Guardian Vision – AI Powered Child Safety Monitoring System

Python, YOLOv8, DeepSORT, Flask, OpenCV

- Developed an AI-powered surveillance system for real-time child detection and identity-aware tracking.
- Implemented YOLOv8 for child detection and DeepSORT for object tracking across video frames.
- Designed danger-zone monitoring logic with automated email alerts for suspicious movements.
- Built a Flask-based dashboard for live surveillance, recorded video analysis, and event monitoring.

AI-Based Attendance and Payroll System

Python, OpenCV, Face Recognition, Flask, SQLite

- Developed a facial recognition-based attendance and payroll system using Python, OpenCV, and Face Recognition.
- Automated employee identification, attendance marking, payroll calculation, and report generation.
- Integrated SQLite for secure attendance record management and report storage.

Internships

Corizo – Web Development Intern

Jul 2024 – Aug 2024

- Completed hands-on training in HTML, CSS, JS, and responsive web development through practical assignments.
- Developed responsive web pages following modern UI design principles and problem-solving skills.

Deloitte Australia Data Analytics Job Simulation – Forge

May 2025

- Completed a virtual job simulation focused on data analytics and forensic technology workflows.
- Built interactive Tableau dashboards and analyzed datasets using Excel to derive actionable business insights.

Certificates

- Java for Beginners and Website Development – Infosys Springboard
- Java Programming – Learnite
- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional

Achievements

- 1st Place Winner – Think Hack 2025, RMK Engineering College.
- Top 10 Project – 6th International Project Expo organized by PECTeam.
